

KOMAL GIRI

Software Development Engineer (SDE)

+91-7850056842 | komalgiri789@gmail.com | linkedin.com/in/komalgiri | github.com/Komalgiri | Portfolio

PROFESSIONAL SUMMARY

Full-Stack Software Development Engineer with **1.5+ years of hands-on experience** building and shipping production-grade web and mobile applications. Proven track record of owning end-to-end feature development — from architecting AI-powered platforms and LMS systems to delivering cross-platform mobile apps in healthcare and civic tech domains. Proficient in React.js, React Native, Node.js, REST APIs, Firebase, and MongoDB. Adept at writing clean, scalable code, leading cross-functional teams, and consistently delivering measurable impact — including **25% faster page loads** and **30% faster feature delivery**. Actively seeking an SDE role where I can build impactful products at scale.

TECHNICAL SKILLS

Programming Languages:	C++, Python, JavaScript (ES6+), SQL
Frontend Development:	React.js, React Native, HTML5, CSS3, Responsive Web Design, UI/UX, Next.js
Backend Development:	Node.js, Express.js, REST APIs
Databases:	MongoDB, PostgreSQL, Firebase Firestore, NoSQL
Cloud & DevOps:	Firebase, Netlify, Git, GitHub, CI/CD, Agile
AI Tools:	ChatGPT, Claude (Opus, Sonnet), Cursor, GitHub Copilot, Gemini
CS Fundamentals:	Data Structures & Algorithms (DSA), OOP, SDLC, Debugging
Tools & Platforms:	Android Studio, Figma, Jira, VS Code

PROFESSIONAL EXPERIENCE

Software Developer | *Creditor Academy* May 2025 – Present

- Led frontend and API integration for the **Learning Management System (LMS)** platform, building scalable React.js-based interfaces and improving page load time by **~25%**.
- Worked as a full-stack developer, delivering end-to-end features including responsive frontend systems and backend REST API integrations using Node.js and Express.js.
- Owned the architecture and implementation of the **AI-powered eBook Platform**, driving feature design, system design decisions, and full-cycle development from ideation to deployment.
- Spearheaded the development of the **Virtual Instructor System**, enhancing interactive learning experiences through AI-driven features and intelligent user engagement workflows.
- Developed **10+ reusable UI components** and a standardized design system, accelerating feature delivery across teams by **30%** and improving frontend consistency.
- Integrated REST APIs and backend services to ensure seamless real-time data flow and reliable cross-platform functionality across all products.
- Tech Stack: React.js, Node.js, Express.js, REST APIs, AI APIs, Git, GitHub, Next.js*

Software Developer Intern | *VanTech Med* Aug 2024 – Apr 2025

Remote | Vancouver, British Columbia

- Worked on cross-platform Android and iOS healthcare applications focused on analyzing health patterns and improving user accessibility.
- Developed and integrated **5+ functional features** using React Native, Firebase, and external APIs for health monitoring workflows.
- Collaborated on UI/UX design improvements and mobile app optimization using Figma and Android Studio.
- Participated in frontend-backend integration and feature testing to ensure smooth application performance.
- Tech Stack: React Native, Firebase, Android Studio, Java, REST APIs, Figma*

EDUCATION

B.Tech, Computer Science and Engineering **2021 – 2025**

Roorkee College of Engineering, Roorkee

CGPA: 8.9 / 10.0

Uttarakhand Technical University

12th, CBSE **2021**

Kendriya Vidyalaya Phulera, Rajasthan

85%

Central Board of Secondary Education (CBSE)

PROJECTS

UdyamPath *React.js | Node.js | REST APIs | MongoDB | RBAC | GitHub*

Job & Course Discovery Platform

- Architected and developed a scalable full-stack job and course discovery platform supporting **50+ listings**, enabling students to search jobs, internships, and upskilling courses in one interface.
- Implemented advanced search algorithms, dynamic filters, saved listings, and category-based navigation to improve content discoverability and user experience.
- Designed and enforced Role-Based Access Control (RBAC) – separate user and admin dashboards for content management, posting, updating, and quality moderation.
- Built a clean, API-driven frontend architecture using reusable React.js components, improving maintainability, load performance, and future scalability.
- Integrated MongoDB for flexible NoSQL data storage and Node.js/Express.js for backend routing and business logic.

AI Sewa App *React Native | Firebase | AI APIs | REST APIs | GitHub*

AI-Powered Public Service Mobile Application

- Built an AI-powered cross-platform mobile application integrating **5+ functional modules** to solve real-world civic challenges: safety, emergency healthcare, and public service delivery.
- Developed AI-driven features including intelligent complaint filing, real-time disaster alert notifications, and geo-location-based emergency facility access using external APIs.
- Built additional high-impact modules: agricultural advisory tools for farmers and an AI smart tourist guide, expanding the app’s public accessibility and utility.
- Led a cross-functional team of **5** through design, development, testing, and deployment – awarded **2nd Prize** in the AI Mobile App track at UTKARSH 1.0 State-Level Hackathon.

Mentora *React Native | React.js | Firebase | Netlify | CI/CD | GitHub*

Mental Well-being & Productivity Platform

- Developed a cross-platform mobile and web application with 4 core modules: mentor support, self-care resources, mood tracker, and storytelling – targeting student mental health and daily productivity.
- Integrated an AI-powered chatbot for real-time conversational user interaction, providing personalized mental wellness guidance and daily engagement tracking.
- Deployed the web application on Netlify with automated CI/CD pipelines via GitHub Actions, ensuring reliable and continuous delivery of updates.

ACHIEVEMENTS & LEADERSHIP

Competitions & Academic Recognition

- 2nd Prize — UTKARSH 1.0 State-Level Hackathon (2024):** Competed among 100+ teams; led the AI module design of a civic tech mobile app, winning in the AI-based Public Service Application track.
- Award of Academic Excellence (2025 & 2026):** Received in both years for consistently maintaining a high academic standing in Computer Science and Engineering.
- Outstanding Performer — Placement Preparation Program** by Dr. Ankush Mittal: Recognized for strong aptitude, problem-solving skills, and technical interview readiness among a competitive cohort.

Leadership & Community Building

- Treasurer, Tech Club Trojan:** Spearheaded the college’s primary technology club — organized **10+ technical events**, coding contests, and peer mentorship sessions, growing active membership to **100+ students**.
- Campus Representative, TechLearn:** Promoted technology learning initiatives on campus, increasing student participation in tech programs by **25%** within one semester.
- Workshop Coordinator, IIT Roorkee — Design Innovation Center:** Independently planned and coordinated **5+ technical workshops** for students on emerging technologies and software development practices.
